Procurement Officer
Municipality of East Hants
Telephone: (902) 883-7098, Ext 232
Email: mhatfield@easthants.ca

EAST HANTS
We live it!

NOTES & CLARIFICATIONS FROM SITE BRIEFING

1. There are no cross-section or previous profiles of the lagoon available. East Hants has provided such drawings and information that it has available.
2. The site currently operates to about 50% capacity and meets all parameters regarding its operating permit. There is no screening of the effluent before it enters the lagoon system. All equipment and processes continue to operate normally.
3. There are two electrical plugs on the exterior of the blower building which the Consultant may use in providing the Services. Water services, if needed, are also available inside the blower building.
4. The Consultant may have to use a watercraft to perform some of the Services. The Consultant is responsible to meet all of the requirements to operate the watercraft safely, including, without limitation, the use of a portable flotation device (PFD) by operators and observers. It is recommended that the Consultant verify their insurance coverage includes watercraft, in particular the size and type of watercraft they intend to use to complete the Services.
5. Section 1.1.3.2. of Schedule A of the RFP requires the Consultant to provide an estimate of what it may cost East Hants to dewater the sludge. Such cost estimate is to be based on disposal of the dewatered material on site.
6. Access to the lagoon site passes two residential properties with small children in residence. Care must be taken when using the access road to watch for the children and other pedestrians. Drivers are advised to reduce speed to 10 KPH when passing these houses.
