1. CLARIFICATIONS ..... 3

## 1. CLARIFICATIONS

- 1.1. In preparation for this competition, East Hants developed a new methodology for determining the populations of Fire Districts which are not covered by the contract (Indian Brook, Enfield and Mount Uniacke) which we believe is accurate and easily repeatable. We have used this methodology to calculate the remaining population for 2011 and to develop the estimates for 2016.
- 1.2. This method is based on the population figures (historic change) found in the 2012 Socio Economic study created by the Planning & Development Department of the Municipality of East Hants (<http://www.easthants.ca/content/2012-socio-economic-study>). While this study provides a definitive population number for Indian Brook in 2011, unfortunately, the other two Fire Districts do not align with specific population districts, meaning that calculations are necessary.

2011 numbers using current methodology:

<b>Total Pop in 2011</b>	23,195
Indian Brook	1,084
<b>Enfield Fire District</b>	3,994
Uniacke Fire District	3,761
<b>Remaining Population</b>	14,356

2016 estimates using current methodology:

<b>Total Pop</b>	<b>24,053</b>
<b>Indian Brook</b>	1,153
<b>Enfield Fire District</b>	3,913
<b>Mt Uniacke Fire District</b>	3,891
<b>Remaining Population</b>	15,096

- 1.3. The Socio Economic study includes additional projections for the total population (it estimates total population of 24,943 in 2021, for example) which Proponent's may find useful. There are other scenarios with respect to how the population may change contemplated in the report as well.
- 1.4. We have not calculated any projections for the remaining population beyond what we have provided. East Hants does not warrant the accuracy of such projections as they are estimates only.

END OF ADDENDUM
