1. CLARIFICATION 3

1.1 Estimated Material Quantities 3

1.2 Road Weight Restrictions 3

1. CLARIFICATION

1.1 Estimated Material Quantities

The following are estimates of the quantity of materials which are typically transported in each shipment for each Waste Stream. The actual quantity may vary based on many factors, including, without limitation, the quantity of materials available to ship, material composition, Contractor's capacity, time of year, condition of waste, etc..

Recycling:

Containers 8-10 tonne

Fibre 18-19 tonne

Solid Waste: 25-28 tonne

Organics: 16-20 tonne

1.2 Road Weight Restrictions

A question was asked about road weight restrictions. Weight restrictions are the responsibility of Transportation and Infrastructure Renewal. Information about weight restrictions can typically be found on the Nova Scotia website at <http://novascotia.ca/tran/trucking/>.

1.3 Requirements

Proponents are to provide pricing based on the methodology and equipment described in Appendix D, subsection A. *The Deliverables*. Proponents may include in their proposals methods of reducing cost or improving environmental performance, but must be prepared to complete the Services as described once the contract comes into effect.
