1. QUESTIONS 3

APPENDIX A - TENDER FORM (Revision 2) 4

1. QUESTIONS

I have examined the site and it looks like there will be the possibility of bedrock. Are there any provisions we can put in place if we are unable to grade the site due to bedrock and imported fill/breaking is needed.

We want the site leveled as best possible with the material on site, so that it can be landscaped and has no pooling water. We feel there is enough material on site if the contractor uses care when clearing and grubbing but understand that there may be some areas where bedrock will left exposed (not covered with grass).

There is no expectation of breaking rock to level the site

Is the entire "park location" area to be cleared, grubbed & graded? Or just the "park layout areas" and trail sections? The last tender item for "trail stream crossing/culvert" doesn't have a unit of measure - is this a lump sum or by the meter as seen in section 2.10.2.2?

The entire location is to be cleared and grubbed.

The "trail stream crossing/culvert" price item is a lump sum based on the costs associated with installing the culvert, including any materials necessary to incorporate it into terrain. The trail overlay as it goes over the culvert will be measured as part of the trails which are priced per meter.

The Tender Form has been revised accordingly. Please use the revised form when submitting you tenders
