1. QUESTIONS 3

1. QUESTIONS

The following questions have been paraphrased by East Hants:

Does East Hants require a minimum distance between any bore holes/test pits for this proposal?

No. The Consultant should ensure that bore holes are appropriately spaced for the design.

Will the Consultant be responsible for all geotechnical testing needed for this proposal?

The Consultant is responsible for geotechnical testing as specified in Section 2.4 of the RFP documents, relative to the design. Any geotechnical/materials testing required during the construction will be specified as the responsibility of the Contractor.

Is wetland delineation for phase 1 and 2 part of the scope of this project?

Please refer to the attached wetland delineation report that was supposed to have been issued with the RFP document.

Can East Hants confirm if an “As-Built” survey will required at the end of the project.

An ‘as-built’ survey should not be required at the end of the project because the Consultant, in conjunction with the constructor, will be responsible for identifying and recording information for the production of record drawings, during the construction.
