1.	QUESTIONS.....	3
----	----------------	---

1. QUESTIONS

Would it be possible to get further information and/or clarification regarding point 2.1.1.2 of the RFP:

The drawing included with the RFP does not contain enough information to do a structural analysis of the roof truss system. Are there shop drawings, or other information, available for the roof truss?

Unfortunately, we have provided the only drawings we have as part of the RFP package. We have no shop drawings or other information available. We assume that any missing information can be gathered during the visual inspection phase.

What is the intent of the structural analysis, are there any existing concerns with the superstructure?

We do not believe that there are immediate concerns with the superstructure, but want the Consultant to confirm that and give us a life expectancy for the structure and identify any short-term fixes that may be needed, as described in Section 2.
