ADDENDUM 2..... 3

ADDENDUM 2

Under the section “Materials Collected” in the RFP, East Hants had prohibited the use of rear loaders to avoid compacting recyclables to a degree that would be unacceptable to our recycling processor. East Hants have since learned that other Municipal entities are using split rear compaction and that it has been generally acceptable to the processor East Hants uses. East Hants will therefore waive the prohibition against split rear loaders for collection of recycling with the understanding that the Proponent will be solely responsible to ensure the services are completed regardless of the equipment they may propose.

In accordance with this change, clause 124 of the original sample contract provided with the RFP will be updated as follows:

“124 The Contractor’s collection vehicles used for recyclables collection shall not cause a deterioration in the quality of the materials or affect the ability to process the materials. Without limiting the generality of the foregoing, the recycled materials shall not be compacted to a density greater than 150 kg/m³. If recycled materials are damaged or if the recycled materials cannot be processed, the Contractor must dispose of the materials at their own cost and make such changes to equipment as are necessary, at their sole expense, to correct the problem. Such corrections may not impact the scheduled collection of recycled materials.”
