Procurement Officer
Municipality of East Hants
Telephone: 902-883-6232
Email: mhatfield@easthants.ca

EAST HANTS
We live it!

Contents

1. CLARIFICATIONS	3
-------------------------	---

1. CLARIFICATIONS

- 1.1. During the site visit, a potential bidder asked if equipment may be stored on the site. East Hants responded that was acceptable in accordance with 2.11.6. of the RFQ where we said:

“The Contractor may, by prior arrangement with East Hants and where possible, stockpile or store equipment and materials on the Location for use in performing the Services. The Contractor would do so at their own risk and neither East Hants, nor their tenants, will be responsible in any way for lost, stolen or damage materials or equipment.”

Further to this, East Hants will work with the selected Contractor to determine an appropriate location to park the equipment so that it does not affect traffic movement at the facilities.

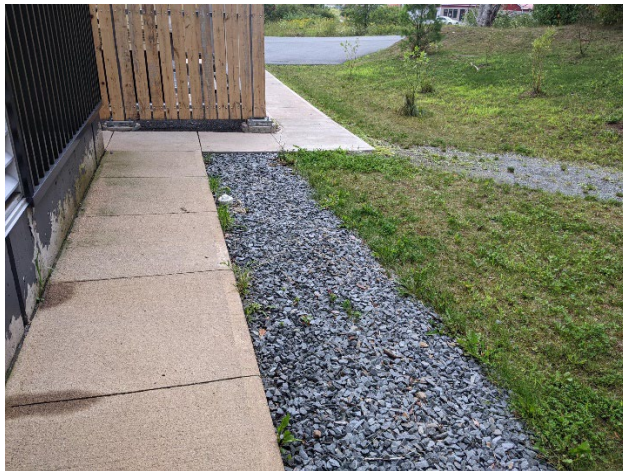

- 1.2. East Hants noted that accessible parking area was of high priority.
- 1.3. The contract for sidewalk clearing includes the sidewalk along Commerce Court. The extension that connects the sidewalk along Commerce Court to the sidewalk for 15 Commerce Court (LEMC building) was not established when the original contract was signed for sidewalk maintenance. The original intent was for entire length of the Commerce Court sidewalk to be included, which would make the demarcation point from that contract to this contract for Lloyd E. Matheson Centre and Aquatic Centre approximately where the new apron starts near the storm grate in the cul-de-sac. Currently it is the same contractor doing both; if that changes, East Hants will work with both contractors to determine a reasonable demarcation point and standards for the transition.

- 1.4. This contract does not include the cul-de-sac area of Commerce Court, but does include the sidewalk and apron area on the Aquatic Centre side of the cul-de-sac.

- 1.5. The emergency exit clearing described on page 17 beginning “The end of the roof...” describes a requirement to clear a path from the exit door to a point where staff and patrons could use other pathways to get to the muster point. In reviewing during the site briefing, it seems reasonable to clear the section of sidewalk outside the emergency exit running toward the back of the building and then link to the existing gravel path end behind the wooden wall.

END OF ADDENDUM
