1. QUESTIONS.....	3
-------------------	---

## 1. QUESTIONS

1. There are culvert crossings within the proposed study area. Are survey data available for these structures or is the collection of this survey data included in the current scope?

East Hants anticipates that there are four (4) culvert locations along the study area.

We only have information on one (1) of the four (4) culvert locations; please find attached record drawings for Turner James, this is a Municipally owned road. The other three (3) locations, Popular Drive, Logan Drive, and Towerview Court, we have no information as these are provincially-owned roads.

The scope of the project will include the surveying of the culverts located at Popular Drive, Logan Drive and Towerview Court, to be utilized in their analysis and recommendations. Please include this cost in your lump sum response.

Staff will walk Paley Brook on Thursday and confirm that there are no other culverts along the extents of the study area and provide further instructions, if needed.

2. Is it possible to obtain the Appendix A in Word format?

No. This Cost Form is issued as PDF only.

There are a number of readily available tools to fill and sign PDF documents or the document may be printed, sign, rescanned, and submitted. Word files also cannot be submitted with a response (the submission system does not accept Word or Excel files).
