REQUEST FOR PROPOSALS

Paley Brook Flood Risk Mitigation Study
RFP50748 - Addendum 2

Release date: October 2, 2024

Proposals will be received up to
2:00:00 pm local time on October 4, 2024

Contact: Michael Hatfield
Procurement Officer
Municipality of East Hants
Telephone: 902-883-6232
Email: mhatfield@easthants.ca

1. QUESTIONS

1. We have the following question regarding the Paley Brook RFP Item 2.1.1.1 a:

Oftentimes LiDAR is typically adequate to use for the areas outside of the main channel, but not accurate enough to capture the detail of a watercourse channel itself, due to varying densities of vegetation and/or water surface levels. For a study like this, it is typically recommended that a topographic survey is completed of the channel itself, to increase model accuracy. Should topographic survey of the watercourse channel be included in the scope of work?

The expectation is the study will be completed utilizing Lidar data. We have indicated a quantity of samples survey points to be taken across the study area to validate the Lidar data. If, during the study, it is determined that the Lidar data is poor we would expect this to be presented in the observations, and that recommendations would be made accordingly (such as consideration to complete topographic mapping of the watercourse).

END OF ADDENDUM
