2:00:00 pm local time on February 7, 2025

Contact: Michael Hatfield
Procurement Officer
Municipality of East Hants
Telephone: 902-883-6232
Email: mhatfield@easthants.ca

EAST HANTS
We live it!

1. SITE BRIEFING

In response to the site briefing today, the following revisions are made to the scope of this RFP:

EAVESTROUGH

Redact the following Design Requirements:

- “No devices or penetrations on metal wall panel cladding will be acceptable”

Add the following Design Requirements:

- Any connection, penetration or damage to existing metal wall panel cladding surfaces or around field drilled holes shall be reinstated.
- Downspout properties (material, grade, size, thickness, etc.) to take into consideration durability and feasibility to meet the active environment of a public splashpad which may include, but not be limited to, children’s activities or persons leaning and bumping into downspouts.

INFILTRATION TRENCH

Add the following Design Requirements:

- Design to include proposing catch basin(s) connected to the proposed below grade solid PVC pipe to alleviate any potential ponding water experienced on the final finished concrete surface.

SANITARY PUMP STATION - VENT PIPE

Add the following Design Requirements:

- At the exterior of the building, the exhaust pipe shall extend to the top of the concrete wall, but not above. Do not extend into the glass section of wall.
- At the exterior of the building, visible portions of the proposed vent pipe shall color match existing concrete wall.

SAFETY CERTIFIED

The intent of 1.11.5.1. is to ensure that the proponent has an audited safety system compliant with the WCB Safety Certified audit process. In reviewing the WCB process, one to three-year audit cycles are compliant and East Hants will accept certificates of recognition with audit schedules other than “annual”.
