1. QUESTIONS	3
--------------------	---

1. QUESTIONS

We would like to propose a proven method for constructing grass berm edges, creating a gentle slope that would allow children with reduced mobility to access the playground module more easily compared to standard grass berm designs.

The standard grass berm design does not fully align with the principles of inclusivity, as it presents challenges for children with reduced mobility to access the play area effectively.

By modifying the grass berm to improve accessibility, we could reduce the size of the protective zone initially planned and better align with your expectations.

1. Would you be open to this grass berm edge modification proposal?

Please bid in accordance with the instructions of the Request for Quotations.

2. We also noticed that the 8,000 ft² area is significantly larger than what is required for the planned equipment. If the grass berm edge modification is not acceptable to you, would you consider allowing us to reduce the protective zone size for the playground area?

Bidders are not required to use the whole 8000 sq ft, that's just what's available. As the budget is fixed, East Hants is evaluating based on how the Bidder proposes to use the site.
