QUESTIONS 3

QUESTIONS

I am currently reviewing RFQ50793 - Application of Dust Control and would appreciate clarification on the following points to ensure an accurate and competitive submission:

1. Application Layers: Will the dust control treatment be applied once, or will multiple layers be required throughout the season?

This is entirely dependent on the weather we receive. Minimum is one application, and typically we see two applications in a season, however additional applications over the minimum are dependent on whether we receive extremely dry or wet conditions during the application season.

2. Project Start Date: What is the expected start date for the application process?

May 15th is generally a good starting point but is weather dependent.

3. Weekend Work: Is weekend work permitted, or must all work be completed on weekdays?

Weekend work is allowed with prior notice.

4. Traffic Management Requirements: Are there any specific traffic control measures required during the application process? If so, will the municipality provide traffic management, or is it the contractor's responsibility?

Section 2.4.1.6. speaks to this requirement. Traffic control must conform to the most recent Traffic Control Manual. Access to homes is to be maintained. Traffic Control will be the responsibility of the contractor. The Bidder Questionnaire contains questions with respect to the cost of traffic control.

5. Site Access & Restrictions: Will the contractor have unrestricted access to all roads, or are there any time or location-based restrictions we should be aware of?

East Hants does not see any reason for restricted access to roads. More clarification on the request may be needed. East Hants must approve when work will be completed and must be informed when plans change.

6. Post-Application Monitoring: Is there a requirement for ongoing maintenance or reapplication if dust control effectiveness decreases before the next scheduled service?

Monitoring will be completed by East Hants, any issues with application will be discussed with the winning contractor.

7. Budget Allocation: Has a budget been set for this project, or should we submit our bid purely based on our own cost estimates?

Budget has been assigned but is not disclosed. Contractors should bid as they see fit.
