## 1. OBSERVATIONS FROM SITE BRIEFING

While doing the site briefing for this competition, some things were noted which East Hants believe need clarification:

In the gravel area adjacent to Aquatic Centre there is a manhole cover which is difficult to see. This was noted by staff and should be part of the operational plan the contractor creates if they are successful.

The area pictured below is between the dome and main Sportsplex building and would need to be cleaned out in the event of a storm. There is no “through” routing; snow would have to be removed from this area.

There is a manhole cover in the gravel area adjacent to the Skate Park which the Contractor should be aware of build precautions in their operational plan. A paving project is planned for the parking area, but may not remove this issue.

Snow coming off of the Dome roof can be challenging as well (heavy and with a lot of force), so the contractor should address this in their operational plan as well, if successful.

The previous contractor working at the Sportsplex stored salt on site, in a container that they provided. This is acceptable should the next contractor wish to use this methodology.
