FIVE-YEAR CAPITAL BUDGET SUMMARY ..... 4

CAPITAL PROJECT REPORTS... ..... 12

# INTRODUCTION

The Municipality of East Hants prepares a proposed five-year capital budget on an annual basis for review and approval by Council. The budget assigns a project number that will remain with the project until completion. Each project is detailed on a Capital Project Report form. This format provides a summary of all projects by fiscal year, as well as a single reference page for each project.

The Capital Project Reports in the 2018/2019 - 2022/2023 capital budget may include:

- projects approved in prior years that are expected to continue beyond March 31st, 2018;
- projects approved for further study in prior years that have not yet been actioned, but are still proposed as a requirement either for approval or for further study on a go forward basis;
- new projects proposed to Council for approval to commence in any of the years 2018/2019 through 2020/2021;
- new projects proposed to Council for approval for further study to commence in any of the years 2018/2019 through 2022/2023.

Each capital project requires source(s) of funding, be it from operations, reserves, debenture, or an external source. Over the years, the Municipality has established various reserves in the following categories:

- general capital reserves (funded through revenue each year);
- special reserves (monies set aside for a specific purpose);
- open space reserves (money set aside from the Open Space Management fees);
- infrastructure reserves (trunk sewer and water fees); and
- depreciation reserves (water utility).

As projects progress through their timelines, alternate sources of funding may become available in lieu of reserve or debenture financing. For example, other projects may / may not have proceeded as planned thereby freeing up reserve monies, other projects may have been completed under budget, external funding opportunities may become available, etc. Staff is seeking approval to alter the form of funding where necessary to maximize the financial benefit to the Municipality; **however, in no situation will staff use this authority to increase the amounts to be debentured.**

The Municipality of East Hants Budget Management Policy (Section 8.1) outlines the ability of the CAO to authorize budget over-expenditures within certain defined parameters. Expenditures exceeding the amounts set by policy, which have not been specifically approved as part of the Capital Budget, will require specific Council approval prior to expending funds.

The time frames indicated for each capital project are estimates only. Certain projects included in this budget are approved for opportunities as they arise or may be subject to forces that may prevent or delay spending. In these instances, the approved spending limits are carried over to the following fiscal period. Conversely, capital projects that involve the purchase of a single item do not carry over from year to year (vehicle replacement excluded), unless the procurement of that item is underway; depending on the value of the procurement, this would require, for example, that competitive bids had already been received, or that a tender or RFP had already been issued.

All expenditure amounts in this document include all relevant non-reimbursable taxes.

For each capital project, the following key data is provided on the Capital Project Reports:

**Project #** - Reference number for capital budget item. This will not change from year to year; the first two digits indicate the initial year in which the project was approved by Council in a capital budget (i.e. capital projects approved in 2017/2018 were assigned project numbers in the format 17-xxx; capital projects, subject to approval in 2018/2019 are assigned project numbers in the format 18-xxx, and so on).

**District** - This is intended to approximate the geographical location or primary area of impact for the project.

**Department** - Reflects the department that is ultimately responsible for the project.

**Asset Category/Life Expectancy** - assigned based on classes of tangible capital assets.

**Initial Approval** - This section reflects the fiscal year when the project was initially approved, as well as the mode of approval, Capital Budget or Council motion. Projects that were “Approved for Further Study” in prior years are not reflected in this section.

**Estimated Completion Date** - for projects funded by debt, this date provides information related to estimated timing for debenture issuance and related carrying costs. For other projects, this information is used to estimate balances in various reserves and for staff planning purposes.

**Work Order #** - Used internally for posting and tracking capital expenditures and budgets. Where no work order is shown, one will be generated following the passing of the capital budget.

**Previously Approved Detail** - Total amount already approved by Council, either through a Council motion or in a prior Capital Budget.

**Approval Sought** - An amount that requires Council approval, and for which Council has not previously provided approval through a prior year capital budget or by Council motion. It is possible that funds will be sought for re-approval through this field if prior approval to spend these funds has lapsed. Where a project is already in progress (has funds showing in the “Previously Approved” rows), the approval sought amount would represent a supplemental request for funds.

**Approval Sought for Further Study** - In the case of tentative or uninvestigated items, Council is asked to approve the budget in principle, but not give authority to proceed with a purchase. There is nothing firm about the numbers in this section; they represent an estimate by staff - a “ball park” number. By approving the budget, Council is authorizing staff to utilize staff time on studying relevant options, thereby acknowledging or verifying the worthiness of the proposed project. A report back to Council, seeking approval to proceed, will be required.

**Estimated Spending by Year** - This information will be used primarily by the Finance division to plan for financing of multi-year projects. Multi-year construction projects typically have only a portion of the costs earmarked to be spent in any one year; for example, on a sidewalk project, the amount in year one may represent design, while the remaining funds for construction are budgeted in the following year(s).

**Sources of Funding** - This section provides details of all proposed internal (i.e. from various reserves or from operations) and external funding sources, such as Build Canada Fund (BCF), Gas Tax or other funding partners, based on information available at the time of budget preparation. Any funding requirements for a particular project in excess of the estimated sources of funding will require debt financing. Where projects have been identified for “Further Study”, sources of funding have been identified for planning purposes only; this does not constitute authority to proceed with debt issuance or withdrawal from reserves.

**Net Budget - Funded by Debt** - Municipal debt financing is based on parameters established by the provincial department of Municipal Affairs.

**Project Summary** - A brief description of the nature of the project, including links to other projects, departments and/or operational requirements.

**Project Objectives/Deliverables** - Specific outcomes to be expected from the spending of these funds.

## MOTION TO COUNCIL

Move to recommend to Council that the five-year Capital Budget for the fiscal years 2018/2019 to 2022/2023 as presented be approved and adopted effective April 1<sup>st</sup>, 2018. Administration is given approval to proceed with the previously approved capital projects and those in the “Approval Sought” sections, subject to any conditions limiting such projects in previous motions of Council or in policies of Council. Should time permit, staff are authorized to embark on projects in this Capital Budget that require long-term pre-planning prior to April 1<sup>st</sup>, 2018. Projects “Approved for Further Study” are approved in principle only; amounts identified as “Approved for Further Study” cannot be expended prior to presentation of a full report to Council for consideration or approval through a future capital budget process. Where time permits, staff are given approval to proceed with “Approval Sought” projects from 2019/2020 prior to April 1<sup>st</sup>, 2019;

And that, any projects approved in the 2017/2018 Capital Budget not reflected as carried forward to the 2018/2019 Capital Budget, but that are substantially committed at March 31<sup>st</sup>, 2018, shall be carried forward to 2018/2019, based on the remaining budget at March 31<sup>st</sup>, 2018;

And that, this five-year estimate of capital spending form the Capital Investment Plan (CIP) as required by the Federal and Provincial government funding agreements;

And that, the Water Utility sections of this budget are permitted to stand alone as the East Hants Water Utility Capital Budget as required by the Nova Scotia Utility and Review Board (UARB);

And that, staff be given authority to alter the source(s) of funding where necessary, but in no case shall the amounts to be debentured increase without prior approval of Council;

And that, Council seek Ministerial approval for a temporary borrowing resolution (TBR) for any amounts in this Capital Budget under the “Debenture/Debt” category of funding;

And that, pre-approval to borrow amounts in this Capital Budget under the “Debenture/Debt” category of funding for a term not to exceed twenty-five (25) years at a rate not to exceed 6.5%.

# FIVE-YEAR CAPITAL BUDGET SUMMARY

The following schedules summarize Capital Projects, organized into sections for each fiscal year of the five-year capital budget, based on the upcoming year when spending is estimated to first occur on the project.

1. Project Summary	
<p><b>This will be a multi-year infrastructure project including reconstruction of water crossings, entry/exit points and rest stop areas. Working with community groups and other municipalities could lead to the development of a multi-use trail that will provide residents and visitors an alternative route and means of transportation from Maitland to Windsor. Potential sources of funding could be the local ATV/Snowmobile clubs, NS Gas Tax Fund for rural development, Federal funding and/or ACOA.</b></p>	
2. Project Objectives/Deliverables	
<ul style="list-style-type: none"> <li>- <b>Plan for and create infrastructure that improves the connectivity of: roads, tourism routes, multi-use trails, and active transportation networks.</b></li> <li>- <b>To attract visitors to the area who wish to use the trail (year round).</b></li> <li>- <b>Develop a multi-use trail across the Municipality for public use.</b></li> <li>- <b>To mitigate the impact on public and private lands by providing ATV and snowmobile users a safe and engaging trail</b></li> </ul>

<p>1. Project Summary</p> <p><b>In October 2015, NSE amended the approval to operate the Shubenacadie Wastewater Treatment plant. The approval now states that the approval holder is required to build a plan to meet CCME guidelines by 2020, with an expiry of the approval to operate in 2025. An environmental risk assessment was completed in 2017 which concluded that only minor updates are required with respect to alignment to the CCME guidelines, thus the capital replacement timing is currently considered a strategic choice regarding capacity building priority versus a regulatory requirement.</b></p>

<p>1. Project Summary</p> <p><b>This project is to replace the two pumps and its associated piping at the Isenor Road Lift Station located at 51 Isenor Road, Lantz. This project is necessary as the pumps have reached the end of their asset life and are in need of replacement. Piping and associated maintenance infrastructure (e.g. guide rails) have also decayed and are in need of replacement. A new control panel and SCADA equipment at this station so that it can be continuously monitored by the Municipality's SCADA system.</b></p>	
<p>2. Project Objectives/Deliverables</p> <ul style="list-style-type: none"> <li>- <b>Prioritize renewal of aging infrastructure, meet new regulatory requirements and position the municipality to provide sustainable services and accommodate growth.</b></li> <li>- <b>This project will replace the two pumps at Lift Station # 19 with similar ones as well as the associated piping infrastructure needed for maintenance of the site. New process control and SCADA equipment will be installed and upgraded to meet current CSA and building code standards.</b></li> <li>- <b>This project will be submitted for PCAP funding.</b></li> </ul>

1. Project Summary
 

**The existing meters in the water utility currently read in imperial gallons and approximately 60% of the meters have exceeded the industry standard life span of 20 years. This project will address and protect the water utility against a forced conversion in a market that has largely already moved to cubic meters. The replacement meters will read in cubic meters and have radio-read technology which will lead to improved readings, allow for more accurate leak detection and troubleshooting capabilities. This project was included in the water rate review applicable filed with the UARB.**
2. Project Objectives/Deliverables
  - **Purposeful planning of long term infrastructure needs and related funding models.**
  
  - **Upgrade water meters to wireless or radio-read technology over five years and improve water meter reading efficiency and accuracy.**
  
  - **Convert water meters and financial data from imperial (imperial gallons) to metric (cubic meters).**
3. Which East Hants Key Strategy does this project align? Infrastructure Renewal
4. Is this project mandated by regulatory authorities? Yes
5. *(For East Hants Water Utility projects only)* Was this project included in the last Nova Scotia Utility and Review Board rate review? Yes

<p>1. Project Summary</p> <p><b>The Waste-Recyclables Transfer Station located at the WMC in Georgefield was originally designed to manage waste only, however, shortly after construction recyclables were being stored and transferred from the building. In December 2013 there were days where the facility was at capacity and the turning radius of equipment was significantly reduced (near miss hazard). The capacity issues are a result of processing facility receiving issues. Growth in construction = growth in waste.</b></p>	
<p>2. Project Objectives/Deliverables</p> <ul style="list-style-type: none"> <li>- <b>Purposeful planning of long term infrastructure needs and related funding models.</b></li> <li>- <b>Increase tipping floor space to improve the safety of the both contractors and the public. (the original design for the building did not include storage of recyclables).</b></li> <li>- <b>Increase storage space of recyclables and waste to accommodate both our growth (ie. more waste being produced) and increased activity at our processor facilities and increase cold storage space to secure valuable diversion materials.</b></li> </ul>	
3. Which East Hants Key Strategy does this project align?	Infrastructure Renewal
4. Is this project mandated by regulatory authorities?	No
5. (For East Hants Water Utility projects only) Was this project included in the last Nova Scotia Utility and Review Board rate review?	N/A

- Project Summary**

**Install Sidewalks along Hwy 1 from Etter Road (399 Highway 1) to Giffins Store (645 Highway 1), which is a distance of about 2460 m. This does not include the distance fronting Griffin's as that location is meant as the final destination. Any extension would need to include an additional 60 m to extend the frontage of the Griffin's property. TIR plans to do a major paving job in 2020/21 along Hwy 1 (7.6 kms).**
- Project Objectives/Deliverables**

  - Plan for and create infrastructure that improves the connectivity of: roads, tourism routes, multi-use trails, and active transportation networks.**
- Which of East Hant's key strategies does this project align with ?

Infrastructure Renewal
- Is this project mandated by regulatory authorities?

No
- (For East Hants Water Utility projects only) Was this project included in the last UARB Rate Review?

N/A

1. Project Summary	
<b>This project is related to the replacement of the WMC entrance scale which is over 20 years old. Over the last few years the scale has required increased maintenance and the scale is rusting. Repair costs since 2006 are \$35,415 to-date.</b>	
2. Project Objectives/Deliverables	
<ul style="list-style-type: none"> <li>- <b>Prioritize renewal of aging infrastructure, meet new regulatory requirements and position the municipality to provide sustainable services and accommodate growth.</b></li> <li>- <b>Reduce maintenance costs for the 'old' scale.</b></li> <li>- <b>Improve reliability of the scales at the WMC.</b></li> </ul>	
3. Which East Hants Key Strategy does this project align?	Infrastructure Renewal
4. Is this project mandated by regulatory authorities?	No
5. (For East Hants Water Utility projects only) Was this project included in the last Nova Scotia Utility and Review Board rate review?	N/A
