

New Employee Introductions – March 2021:

Picture not available

Ashley Lush joined us on March 8th as our new HR Generalist. Ashley comes to us with 10 years of human resources experience and has a specialization in compensation and benefits. She will be supporting departments/staff with both human resource and health and safety activities.

Chad Greenham has joined us recently as our new Manager of Water & Wastewater Services. Chad brings with him an impressive and diverse work experience portfolio. He has supported design and construction monitoring of Water & Wastewater Treatment plants. He has also worked on significantly large capital projects such as Muskrat Falls in NFLD and Site C in BC. His work experience has taken him all over North America having been based in 4 different Provinces and 3 different States over his career. Chad is ready to turn that experience into ongoing support for East Hants, while enabling him to plant roots in Nova Scotia with this family. Welcome aboard Chad!

Retirement Announcement:

After 22 years with the Municipality, Lew Landers will be retiring at the end of March. Lew has been a technical steward for East Hants, leveraging his detail-oriented approach to reviews and made technical recommendations with the long-term impacts to the Municipality always in mind. He has kept the Municipality current with regional construction best practice as an active member of the Joint Committee on Contract Documents for years, which has supported and setup the Municipality well for the successful completion of our technical projects. We thank Lew for his service to East Hants and wish him well for his retirement.
