Subject: Community Plan Update

I just wanted to write to say that while I appreciate being informed in the newsletter. - I'm very opposed to what I understand is the province's demand that municipalities implement land use planning in all of the currently remaining unplanned areas.

Having an in my opinion very balanced split between areas with zoning, and non-planned areas is a great advantage for East Hants. As such, at this time I oppose updating the East Hants Official Community Plan and hope that whoever our incoming MLA turns out to be. Will help prevent or reverse these changes.

Thanks for reading, and for the opportunity to provide feedback. - Though since your survey doesn't provide options for either "maintaining the current level of regulation" or for "less municipal regulation". I unfortunately feel like I can't provide my feedback via the survey without misrepresenting what my honest input is.

Sincerely,
Sam Webber
