

## Staffing Changes

### **Marlee Langille, Development Control Assistant**

Marlee started with the Municipality in 2021 as our Planning and Development & Parks, Recreation and Culture Administrative Assistant. In this role she will be providing support to building inspection, bylaw enforcement and EMO. With the increase in building permit activity over that last couple of years, this distinct role became critical.

### **Abby Reynolds, Administrative Assistant**

Abby started with the Municipality in 2022 as our Planning and Development & Parks, Recreation and Culture Administrative Assistant (term). Abby has been working on contract with us since last September and we are thrilled to see her move into the permanent position. Abby will also be providing occasional back up support at the front desk in Finance.

### **Jillian Stymest, Asset Coordinator**

Jillian started with the Municipality in the fall of 2021 as our Planning and Development Technician. Jillian came to East Hants with a strong background in data and research. Her previous work at Eagle GIS included field level implementation of new data collection methods for telecommunication and power assets.

As part of the larger Asset Management Program, the Asset Coordinator will be advancing and then managing the Asset Data Management Strategy that is currently being developed. This will include supporting the data collection needed for GIS integration with the Planning and Development team that has been discussed by every service area as a key way forward.
