Subject: Fire coverage

I am emailing you as im not sure which dept to send this too

I am a resident of rawdon and I've noticed that nine mile river fire is responsible for alot of coverage that would be better covered by rawdon... for example if something happens at cheese factory corner driving normal speeds nine mile is about 10 mins away while rawdon is 5. I know this stems from when there was an upper nine fire hall but that has not been active in 20 years... I think for public safety this boundarie needs to be re visited

Thank you
