Subject: 2025 District Recreation Fund

Good morning Jo,

Could you consider a revised DRF application for a reduced amount for 2025?

The cost of our planned project for 2025 increased substantially when it was determined we would require a more substantial scaffolding system for safety and to access the roof of the building to do the chimney repair. The additional scaffolding would add \$25000.00 to the cost of the 2025 project. As a result we decided not to do the repairs outlined in our original DRF application.

We have sent you a revised application asking if we could amend our 2025 project to \$25215.00 reducing the grant amount to \$12,107.50.

We would really appreciate being able to complete the repointing of the front wall in 2025 to reduce further deterioration of the brick work.

Thank you considering our request.

Hal Hilton
