Subject: Please share with all counsellors in regard of the monument

Sent from my iPhone **Dear counsellors of East Hants I am writing this letter in regards to the movement of the monument from the heart of Shubenacadie. I grew up in Shubenacadie living on Conley hill. Looking over the village where the monument stood tall . From a young age I was in beavers and Boy Scouts and remember on remembrance Day marching from the Legion to the centre of the town, the honour war veterans at the last place. They stood on our soil before getting on the train to never come back. In the last few months, I learned more about this monument placement and it importance to the community. Why it was there how the land was donated to put are soldier there. It blows me away that a piece of history that was placed in 1921 can be moved and put in a different location without notifying anyone. The one positive outcome of this whole thing is the community coming together to realize the monument should be placed back to its rightful home in the heart of Shubie. Hopefully this will make our community stronger overtime. community members can realize they have a voice that can make a difference . so please council members put our monument**

**back where he belongs standing Tall in the middle of our
community. history is not something to be messed with or
moved**

Sincerely, Cody Nelson.
