

Casey Concrete Limited Development Agreement Application

Planning Advisory Committee

December 9, 2025
Planning and Development Department

EAST HANTS

Background

- **Applicant:** Casey Concrete Limited
- **Location:** PID 45177128, 57 Lohnes Street, Hardwood Lands
- **Subject Property Size:** 2.55 hectares
- **Proposal:** To enter into a development agreement to permit a pre-mix concrete batch plant on lands that are zoned Business Park (BP) Zone.
- The BP zone permits Asphalt, Aggregate & Concrete Plant uses by development agreement.
- There is a precast plant and heavy equipment mechanic already on the subject lands.

EAST HANTS

Development Proposal

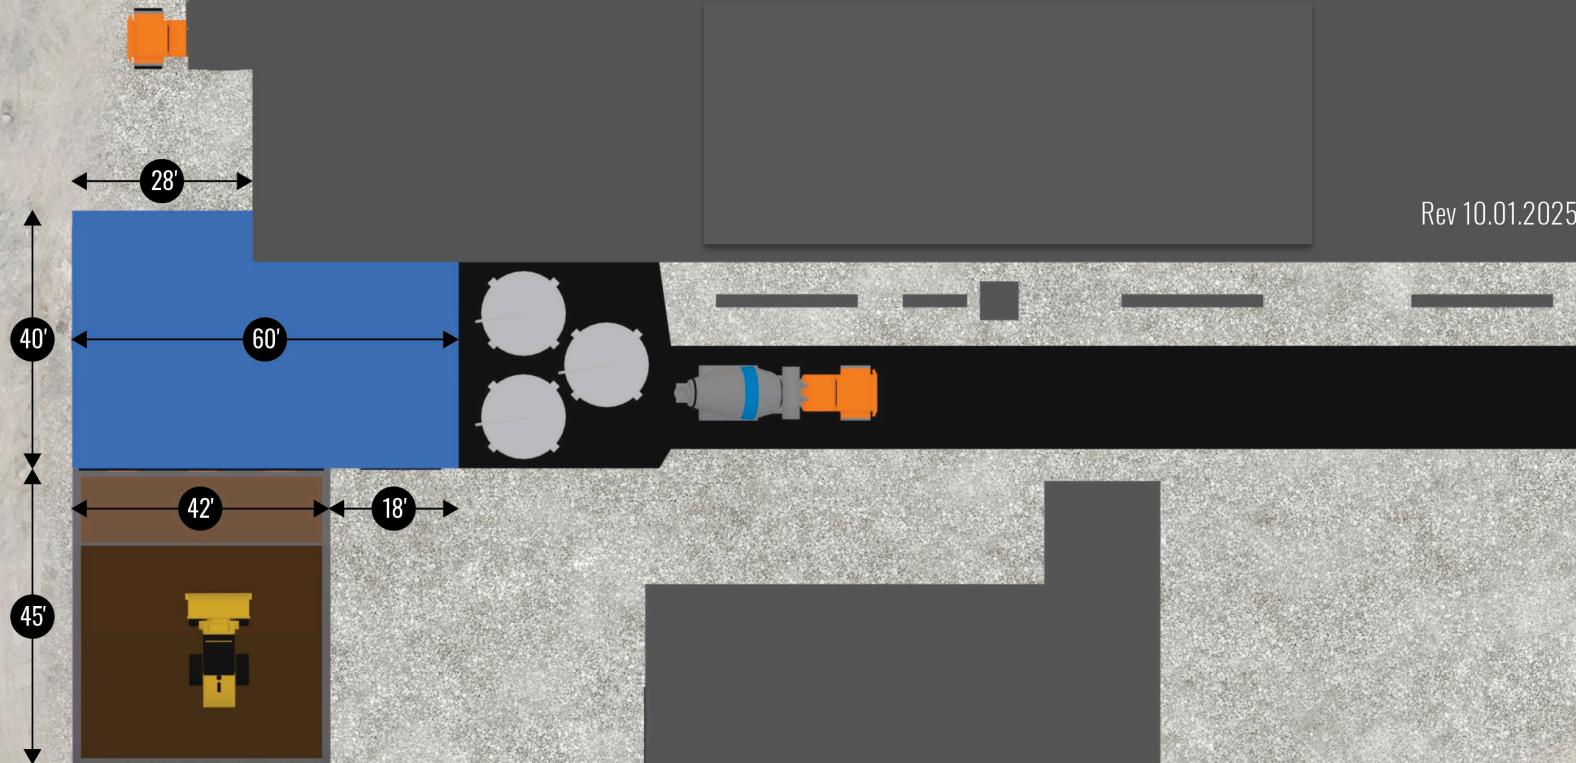

- The proposed building will be approximately 18.3 m x 12.2 m (60 ft x 40 ft) and will be constructed on the northwest corner of the existing building.
- This building will house a concrete mixing plant, aggregate storage bins and a quality assurance lab.
- External to the building, there will be a loading ramp and silos for raw materials.
- The addition of the pre-mix concrete batch plant will allow the precast factory to mix its own concrete batches on-site rather than having to transport the concrete by truck from a ready-mix concrete plant.
- On-site batching of concrete allows for better consistency and, therefore, higher quality control, which in turn will allow the applicant to expand its capabilities.
- Having an on-site electrified batch plant will also help reduce the applicant's carbon footprint by eliminating the diesel-powered trucks needed for production of the concrete used in their daily manufacturing.

Policy Analysis

- Policy ED41 permits Council to consider the development agreement application.
- Nova Scotia Public Works has indicated that a negative impact to the Provincial road network is not anticipated.
- During the initial presentation to PAC, staff were asked how dust might impact the surrounding lands and if the concrete plant at 67 Lohnes Street was to remain open.
- The applicant has indicated that the concrete plant at 67 Lohnes Street will remain operational.
- The plant serves the local ready-mix requirements, and the new batch plant will only supply the precast plant.
- Regarding the dust concern, the applicant explained that the aggregate bins and mixer will be located inside the building, so there will be limited dust created.

Citizen Engagement

- A letter and questionnaire were mailed to all property owners within 300 m of the subject property, asking for comments on the proposed application.
- There were 20 questionnaires mailed and 2 responses received. Questionnaire responses have been provided to members of PAC for their review.
- One of the concerns raised was about the amount of vibration that the proposed pre-cast concrete plant may produce.
- The applicant has indicated that the new plant will have limited vibration because the plant is a conveyor system and a mixer. Similar to what would be used for baking but on a bigger scale, and there is no high-speed equipment that would create vibration.
- Also, there is an existing precast facility on the subject lands; therefore, there may be vibration related to the existing use.
- Staff will comply with public hearing notification requirements.

Recommendation

- That final consideration and approval be given to enter into a development agreement.

Recommended Motion

Planning Advisory Committee recommends that Council:

- *give final consideration and approve entering into a development agreement for a pre-mix concrete batch plant use located on property identified as PID 45177128, 57 Lohnes Street, Hardwood Lands, signed within one year of Council's approval.*
