Subject: Northern training facility -funding

Noel and District Volunteer Fire

Department would request the remaining monies of \$4900 be contributed to help with the cost of a concrete pad at the training facility. This pad would help with our training in vehicle extrication training, clean up of materials and debris that is remaining after the vehicles are removed of this training facility. The additional funding would be covered by Noel and District Volunteer Fire Department. The total cost of the concrete pad would cost approximately \$10,000, this would contribute greatly to the training facility.

Thank You for considering this funding for the training facility.

Don Hughes
