Re: Telecommunications Facility Concurrence
Shared Tower Inc.
File Number: STCE903 - 4249 Highway 354, Upper Rawdon, NS (PID 45216363)

This letter serves as a formal concurrence from the Municipality of East Hants for the proposed construction of a telecommunication antenna system at 4249 Highway 354, Upper Rawdon, Nova Scotia, as part of the process initiated by Shared Tower Inc. The proposal includes the construction of an antenna compound consisting of antennas of approximately 3.485-metre in height.

We are pleased to inform you that Shared Tower Inc. has successfully met the requirements of Policy G32 of the Municipal Planning Strategy Policy - Notification Requirements for Communication Towers and Antenna. As the property is located in the Rural Use North (RU-2) Zone, under Policy GM32 the proponent was required to follow the notification and submission requirements of CPC-2-0-03.

The proponent has indicated that they are required under CPC-2-0-03 to notify affected stakeholders within a radius equal to three times the structure height, measured from the outermost edge of the structure. In this case, the required notification radius is 10.455 metres. As there are no properties within this distance, no notification is required. Accordingly, this letter confirms that the consultation requirements have been met.

Please be advised this letter of concurrence is part of the regulatory process and should be submitted to the appropriate authorities, including ISED, as part of the telecommunication regulatory requirements. If you have any questions regarding this matter please do not hesitate to contact the undersigned.

Sincerely,

Rachel Gilbert
Manager of Planning
