Subject: Notice of Intent to Bid - Red Spruce Wind Energy Project

Good evening,

We are emailing to inform you of our intent to bid the Red Spruce Wind Energy Project in the second round of the Green Choice Program. The project is located on privately held lands in the Hants County region.

SWEB has been developing this project and engaging with the local community since 2021. Please see attached our official notice to bid document, which provides additional information about the project and the procurement opportunity, as well as contact information should you have any questions.

As you may know, we cannot yet guarantee that the project will be feasible or will meet all procurement requirements. However, we want to make sure that all stakeholders are given the opportunity to provide feedback or ask questions as early as possible in the development process, irrespective of any final decision to bid the project into the procurement. Like our efforts in the previous years, our team will engage the community through open houses and provide updates through the project website, social media, and direct conversations. An open house for this project will be planned for this Fall, details of which will be provided as soon as a venue and date are confirmed.

As part of our efforts to reach as many community members as possible, we kindly request that you assist us by printing the enclosed document and adding it to any poster boards or similar community notice spaces in your offices or any other public buildings that are frequented by community members. We are also more than happy to send printed copies should that be helpful. Please also feel free to pass along to your colleagues as you see fit.

Thank you for your previous support of our project development in the region, and we hope you will continue to support our team and project as part of our engagement activities.

Please do not hesitate to reach out should you have any questions regarding this project.

Kind regards,
Mir Sultan

Mir Sultan *(he/him)*
Project Developer
